

# Thomson StockReports+

A comprehensive source for analytics at the stock, industry, portfolio, and market levels.

## Key Benefits

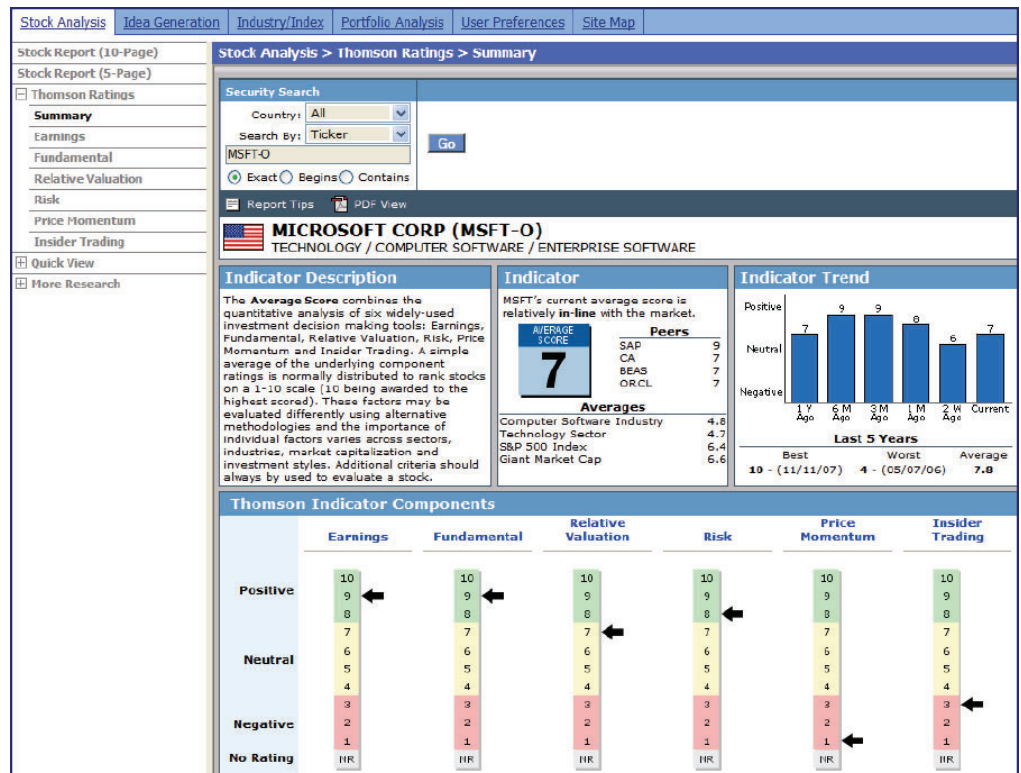

- Conduct in-depth analysis of more than 6,500 U.S. companies, 3,500 Canadian companies and 2,700 U.K. companies
- Use Thomson Stock Ratings and drill down into each component for further analysis
- Compare a company's key metrics to those of its ten closest peers
- View highlights from Thomson Financial's automated text-generation system that identify the most noteworthy data
- Build custom portfolios and track your selected companies
- Print in PDF format or easily export key data elements into Microsoft Excel and customize the data to meet your needs
- Rely on timely data with daily updates and weekly calculation of stock ratings
- Select report tips and glossary items that clearly define report criteria and fields

Thomson StockReports+ is designed to optimize the investment selection process, generate compelling ideas, and deliver time-saving research capabilities. Combining Thomson Financial's independent research, ratings, and market data for companies within the United States, Canada, and the United Kingdom, it places current data into historical context for more accurate forecasting of a security's performance.

Intended to be transparent and easily understood, stock ratings are provided on a scale of one to ten, along with clear detail of the data and calculations that comprise the ratings. The

six component ratings are quantitative assessments of key trends on earnings, fundamental, relative valuation, risk, price momentum, and insider trading.

StockReports+ exceeds the level of coverage and detail offered by competing products with enhanced analysis of security pricing, valuation, and fundamental metrics relative to actual market performance. An automated text-generation system provides specific stock and industry highlights. Unique content, such as stock seasonality and extensive insider trading analysis with proven insider scores, is available throughout the reports.

Independent research and ratings from a sophisticated product driven entirely by market data.

## Essential data and analysis for intelligent financial decisions in a flexible and user-friendly product

StockReports+ includes approximately seventy reports in four different reporting sections. The reports can be viewed in HTML format, printed in PDF format, or exported into Microsoft® Excel for further data analysis.

- Stock Analysis displays a thorough picture of a company's performance and outlook and includes 10-page and 5-page versions of the popular Thomson Stock Report with ratings and the supporting data elements.
- Idea Generation reveals potential candidates through broad level research of the overall market using common financial metrics.

- Industry/Index allows for easy analysis of companies within leading indexes and sectors defined by the standard Industry Classification Benchmarks (ICB).

- Portfolio Analysis includes detailed information on the individual stocks within customized portfolios.

StockReports+ is available on Thomson ONE or as a standalone web solution. Individual reports can also be integrated into client applications.
