Licensed bankers	Mutual fund trading, account management, snapshot quotes
Supervisory managers	Office level reporting
Money managers	Block trading, asset allocation
Assistants	Shadow access, electronic account opening, reporting
Clients	Client access

The Different Investpoint Packages – Technology Made to Match Your Business:

Silver Level: This package offers a reliable software tool for placing trades and accessing account information.

Who would benefit: Investment professionals who need a basic, lower-cost broker workstation and who do not require reporting or advanced functionality.

Gold Level: This package offers innovative functionality, such as customized reporting and advanced trading capabilities.

Who would benefit: Investment professionals seeking to leverage technology that can help them efficiently manage and grow their businesses.

Platinum Level Overview: This premiere package offers the most extensive functionality available, such as portfolio rebalancing, performance reporting and block trading, all fully bundled into one robust front-office software tool.

Who would benefit: Financial professionals with high-touch services, advanced requirements, or office management or supervisory responsibilities.

Customize Your Broker Workstation.

Investpoint offers a private-label design. Firms can customize the design of the broker workstation to be consistent with their own brand.
